

Task 2 - Exploratory Data Analysis (EDA) & Business Intelligence

Objective

The objective of this project is to explore the sales dataset, identify patterns, trends, and relationships, and generate business insights using Exploratory Data Analysis techniques.

Dataset

Sales Transaction Dataset

Tasks Performed

- Descriptive Statistics
- Sales Distribution Analysis
- Customer Analysis
- Product Line Analysis
- Country-wise Sales Analysis
- Monthly Sales Trend Analysis
- Deal Size Analysis
- Correlation Analysis
- Business Questions & Answers
- Dashboard Mockup Creation

Key Insights

- Euro Shopping Channel is the highest revenue-generating customer.
- Classic Cars generated the highest revenue among all product lines.
- USA is the top-performing market.
- November recorded the highest sales.
- Medium-sized deals contribute the largest share of revenue.

Tools Used

- Python
- Pandas
- Matplotlib
- Seaborn
- Google Colab
- PowerPoint

Files Included

- EDA_Report.pdf
- EDA_Notebook.ipynb
- Dashboard_Mockup.pptx
- README.md

Outcome

Successfully identified key business insights and created a dashboard mockup to support business decision-making.
